Requirements Summary: Hands-on Full Stack development; 1 year experience preferred; BA/BS in CS or similar; strong C#, HTML, SQL; AI knowledge; cross-platform integrations.

Key responsibilities (responsibilities and requirements are subject to change based on business needs)

- Develop custom applications using C# / .NET / SQL
- Taking technical ownership of your work delivering high-quality production-ready software.
- Gather requirements and design full stack solutions.
- Provide support on projects and deliverables with our vendor partners.
- Track the status of multiple ongoing projects.
- Performs additional responsibilities as assigned to support the efficient operation of the department and the organization

AI Utilization and Literacy:

- A key function of this role includes the effective use and understanding of artificial intelligence (AI) tools and technologies to enhance productivity, decision-making, and overall performance. This position is expected to maintain awareness of emerging AI applications relevant to their responsibilities, apply AI tools ethically and effectively, and continuously develop their AI proficiency.

Qualifications:

Hands-on experience up to 1 year preferred.

The ideal candidate would have proven knowledge and some hands-on experience using the following technologies:

- HTML, C#, SQL Server.
- AI knowledge and practical usage.

Experience or knowledge with some of the following technologies are not necessary, but would be beneficial:

- Power Automate, MS Flows, MAUI

Competencies:

- Highly motivated, self-starter with a willingness to take on responsibility and new challenges
- Excellent communicator in writing and verbally in formal and informal business settings
- Ability to independently establish schedules and priorities, and multi-task
- Ability to work and communicate effectively
- Ability to work under pressure in a fast-paced environment within stated deadlines
- Strong organizational, planning, and time management skills
- Attention to accuracy and detail
- Effective problem solving and analytical skills
- Strong interpersonal skills
- Ability to work independently and as part of a team

Education

- BA or BS Degree required. A degree in computer science or similar is highly desirable.

Company, one of the largest Professional Employer Organizations (PEOs) in the U.S. with client employees in all fifty states, is looking for talented people to join our team. If you want to contribute your talents, make a bigger impact, and be part of the growing PEO & HRO industry, we are interested in talking to you. Our renowned industry leadership in customer service starts with our people. You can contribute to delivering on our brand promise of helping organizations succeed through our people-first approach in solving customer's ever-evolving HR needs. Our HR offerings include personalized services for HR, employee benefits, payroll and taxes, employer risk, compliance, and employee management. Today, we manage over $3 billion in employment-related costs annually—and we are growing every day.

We are looking for a full-time Full Stack Developer with a passion for developing cutting edge cross-platform integrations in a SaaS environment and third-party vendors.

We are looking for an enthusiastic and motivated top performer with excellent communication skills to work in a small-team agile environment; a prolific coder who is friendly, approachable, and takes intense pride in their quality of work. The Full Stack Developer will participate in design and coding activities with other team members. You will be joining a dynamic development team, where you will have the opportunity to implement the latest technologies, following best practices. As a development team, we truly care about doing things the right way and strive for excellence. We value developers who are willing to contribute their ideas and share opinions on technologies and techniques that can improve our software quality.

You will design, review, test, debug, analyze, modify business applications, and provide technical support for various internal departments. You will be a critical member of a fast-paced development team responsible for front and back-end support and the continued development of these applications.

Due to this role's nature, the ideal candidate will have programming knowledge and "hands-on" team player with the ability to execute in a fast-paced environment.

This is an ideal role for a developer who is looking to grow with our company and build their career. Ideal for someone with an interest in cross platform technology. We are looking for someone who wants to succeed and enjoys solving technical challenges. This would suit someone who is passionate about building various integrations for our business.
