SUMMARY

Full-stack software engineer with hands-on experience in React, TypeScript, and Next.js, and growing back-end skills in C# and .NET. Experienced in building and maintaining production-quality web applications, collaborating across teams, and solving problems with a focus on clarity, maintainability, and continuous improvement.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, HTML, CSS

Frameworks: .NET, ASP.NET, Next.js, Express.js, Astro

Libraries: Node.js, React, MongoDB, Tailwind CSS, Bootstrap

Testing: Xunit, Vitest, Jest, Playwright

Developer Tools: Git, GitHub, VS Code, Postman, Trello, Figma, Vercel, Netlify, Supabase, JSON, REST API

EXPERIENCE

Freelance Full-Stack Web Developer

August 2022 – Present

Independent Consultant

Remote

- Delivered mobile-responsive web applications for small businesses, utilizing Next.js and Vite to optimize SEO and load speeds, resulting in a 25–40% increase in site traffic.
- Engineered custom e-commerce integrations with Square and Clover APIs, automating order processing and driving a 30% increase in online sales volume for retail clients.
- Managed full SDLC from discovery to deployment, consistently delivering projects on time and under budget while acting as the primary technical point of contact.

Volunteer Full-Stack Engineer

February 2025 – Present

Games for Love (Nonprofit Organization)

Remote

- Collaborated with a cross-functional Agile team to design and prototype high-fidelity UI screens in Figma, accelerating the frontend development phase for a React-based live-streaming platform.
- Optimized mobile responsiveness across the donation portal, fixing critical layout shifts and ensuring a seamless UX for mobile and tablet users.
- Participated in code reviews and weekly stand-ups, aligning technical deliverables with project roadmaps to ensure the timely release of donor-facing features.

Health & Safety Process Improvement

March 2023 – Present

Walmart Distribution Center

Temple, TX

- Spearheaded departmental safety initiatives, conducting data-driven root cause analyses of workplace incidents that reduced incident frequency by 20% year-over-year.
- Secured board approval for critical safety upgrades via the Hazard Risk Elimination process (HRE), implementing new visual lighting systems for pedestrian segregation and high-performance thermal PPE.

Forklift Operator

November 2019 – March 2023

Walmart Distribution Center

Temple, TX

- Developed and implemented new workflow systems that increased lift driver efficiency by 15% and boosted overall operational productivity while maintaining strict safety and quality standards.

Lead Technician, Business Class Cable Installation

September 2013 – November 2019

Time Warner Cable

Austin, TX

- Led and supervised a team of 5 technicians in installing and maintaining commercial-grade services for business clients across multiple locations.
- Managed complex business-class installations from initial site surveys through completion, ensuring compliance with local building codes, safety standards, and company protocols.
- Developed and executed detailed project timelines, coordinated equipment and personnel resources, and maintained clear communication with clients to ensure minimal business disruption.

PROJECT

PickleTrack | *TypeScript, React, Tailwind CSS, ASP.NET Core, PostgreSQL, Playwright*

- Deployed a production-ready full-stack application on Azure, featuring multi-tenant architecture with PostgreSQL to ensure strictly isolated user environments.
- Implemented a stateless authentication flow using Google OAuth 2.0, JWT, and ASP.NET Core Identity, following established security guidelines and framework best practices.
- Established a robust CI/CD quality gate by implementing 47 automated tests (xUnit, Vitest) and Playwright end-to-end scenarios, increasing deployment confidence.

Apartment Management System | *Typescript, React, Tailwind, ASP.NET, Supabase*

- Engineered a comprehensive tenant dashboard using React and TypeScript, integrating IoT APIs for smart lock controls and real-time package tracking.
- Accelerated UI development by 40% through the creation of a reusable, accessible component library (forms, skeletons, cards), ensuring design consistency across the application.
- Developed an AI-driven maintenance recommendation engine that processes historical tenant requests to predict necessary repairs, reducing triage time for property managers.
- Built a resilient notification system leveraging React Hooks and WebSockets to deliver instant alerts for emergency maintenance and package arrivals.

PennyWise Finance | *Typescript, Next.js, Supabase, PostgreSQL*

In Development

- Architecting a scalable personal finance platform using Next.js and Supabase, leveraging server-side rendering to optimize dashboard load times.
- Designing a complex relational database schema to handle multi-account tracking and recurring transaction logic, ensuring data integrity across user sessions.
- Implementing real-time budget monitoring using PostgreSQL triggers and row-level security (RLS) to provide instant feedback on spending limits while maintaining strict user data isolation.

EDUCATION

Ashford University

Coursework towards B.S. in Healthcare Administration

- Selected for membership in the Golden Key International Honor Society, recognizing top-performing students
- Maintained consistent academic excellence, earning placement on the Dean's List

Full Stack JavaScript Software Engineer Training Academy

Certificate of Completion
