SUMMARY

Full-Stack Software Engineer specializing in React, TypeScript, and ASP.NET. Experienced in building and deploying production web applications, integrating third-party APIs, and delivering business-focused solutions. Background in leadership, process improvement, and cross-functional collaboration.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, HTML, CSS

Frameworks: .NET, ASP.NET, Next.js, Express.js, Astro

Libraries: Node.js, React, MongoDB, Tailwind CSS, Bootstrap

Testing: Xunit, Vitest, Jest, Playwright

Developer Tools: Git, Postman, Figma, Vercel, Netlify, Supabase

EXPERIENCE

Freelance Full-Stack Web Developer

August 2022 – Present

Independent Consultant

Remote

- Achieved a #2 Google search ranking within 30 days for a local business by implementing SEO strategies, optimizing business profiles, and conducting keyword and competitor research.
- Increased client site traffic by 25–40% by developing mobile-responsive web applications with Next.js and Vite, improving SEO performance and page load speeds.
- Boosted online sales by 30% through custom Square and Clover API integrations that automated ordering and payment workflows.
- Delivered full-stack projects from discovery to deployment while serving as the primary technical point of contact, consistently meeting deadlines and budget requirements.

Volunteer Frontend Engineer

February 2025 – December 2025

Games for Love (Nonprofit Organization)

Remote

- Developed responsive React-based event and sponsorship pages used for Games for Love fundraising galas and donor events, improving the organization's online presentation for sponsors and attendees.
- Collaborated with designers and volunteers to translate Figma mockups into production-ready frontend components, maintaining consistency across event branding and user flows.
- Contributed within an Agile volunteer team through code reviews, stand-ups, and collaborative planning sessions to support ongoing nonprofit web initiatives.

Asset Protection Associate

May 2026 – Present

Walmart Distribution Center

Temple, TX

- Selected for advancement into asset protection to oversee risk mitigation, compliance, and operational integrity across the facility.
- Analyze facility data and monitoring systems to identify operational vulnerabilities, isolate root causes of inventory shrinkage, and ensure policy compliance.
- Partner with senior operations leadership to design and execute proactive loss prevention and workplace safety strategies.

Forklift Operator / Safety Champion

November 2019 – May 2026

Walmart Distribution Center

Temple, TX

- Achieved a 20% year-over-year reduction in workplace incidents by spearheading departmental safety initiatives and applying data-driven root cause analysis.
- Selected as departmental Safety Champion, serving as the primary associate liaison for workplace safety initiatives and risk reduction programs.
- Drove a 15% increase in lift driver efficiency by designing and implementing new workflow systems that improved operational productivity while maintaining safety and quality standards.
- Secured board approval for critical safety upgrades via the Hazard Risk Elimination process (HRE), implementing new visual lighting systems for pedestrian segregation and high-performance thermal PPE.

Lead Technician, Business Class Cable Installation

September 2013 – November 2019

Time Warner Cable

Austin, TX

- Led and supervised a team of 5 technicians in installing and maintaining commercial-grade services for business clients across multiple locations.
- Managed complex business-class installations from initial site surveys through completion, ensuring compliance with local building codes, safety standards, and company protocols.
- Developed and executed detailed project timelines, coordinated equipment and personnel resources, and maintained clear communication with clients to ensure minimal business disruption.

PROJECTS

PickleTrack | *TypeScript, React, Tailwind CSS, ASP.NET Core, C#, Supabase, Playwright*

- Deployed a production-ready full-stack application on Azure, featuring multi-tenant architecture with PostgreSQL to ensure strictly isolated user environments.
- Implemented a stateless authentication flow using Google OAuth 2.0, JWT, and ASP.NET Core Identity, following established security guidelines and framework best practices.
- Established a robust CI/CD quality gate by implementing 47 automated tests (xUnit, Vitest) and Playwright end-to-end scenarios, increasing deployment confidence.

Apartment Management System | *Typescript, React, Tailwind, ASP.NET, Supabase*

- Engineered a comprehensive tenant dashboard using React and TypeScript, integrating IoT APIs for smart lock controls and real-time package tracking.
- Accelerated UI development by 40% through the creation of a reusable, accessible component library (forms, skeletons, cards), ensuring design consistency across the application.
- Developed an AI-driven maintenance recommendation engine that processes historical tenant requests to predict necessary repairs, reducing triage time for property managers.
- Developed a real-time notification system using React Hooks, enabling tenants to receive instant alerts for emergency maintenance requests and package deliveries.

PennyWise Finance | *Typescript, Next.js, Supabase*

In Development

- Architecting a scalable personal finance platform using Next.js and Supabase, leveraging server-side rendering to optimize dashboard load times.
- Designing a complex relational database schema to handle multi-account tracking and recurring transaction logic, ensuring data integrity across user sessions.
- Implementing real-time budget monitoring using PostgreSQL triggers and row-level security (RLS) to provide instant feedback on spending limits while maintaining strict user data isolation.

EDUCATION

Western Governors University

B.S. in Software Engineering (In Progress)

Expected 2027

- Received WGU Excellence Award for exemplary performance in Web Development Foundations coursework
- Focus on full-stack development, backend systems, and database design

Ashford University

Coursework towards B.S. in Healthcare Administration

- Selected for membership in the Golden Key International Honor Society, recognizing top-performing students
- Maintained consistent academic excellence, earning placement on the Dean's List

Full Stack JavaScript Software Engineer Training Academy

Certificate of Completion
